LNMP EDC Blood Group

- 10 week scan and NIPT with pre/post test result genetic counselling and specialist consultation
- 12 week NT scan and NIPT with pre/post result genetic counselling and specialist consultation
- NIPT with pre/post test result genetic counselling and specialist consultation for high risk NT scan elsewhere
- NIPT with pre/post test result genetic counselling and specialist consultation for scan finding or for further reassurance

Notes

NIPT blood test does not replace 12 week NT scan.

Invasive testing (CVS/amniocentesis) recommended if:

1. Nuchal translucency >3.5mm with microarray testing
2. Fetal structural lesion

Fetal echocardiography at a tertiary centre recommended if NT >3.5mm.

12 week scan will effectively screen for open spina bifida.

12 week scan will screen for some major structural anomalies.

Medicare rebates are available for your patient for:

- NIPT specialist consultation and NIPT scan but not for NIPT blood test (sent to USA)
- 10 week scan confirms dates and viability prior to blood test

Arlosa Harmony test as of July 2013

Detection rate:

- trisomy 21 >99%
- trisomy 18 >98%
- trisomy 13 80% sex chromosome anomalies: depends on anomaly

Up-to-date costs are explained at www.sogiscan.com.au

Parking

Validated parking* for SO+GI Scan patients is available in the South Bank Parklands underground carpark located at the end of Tribune Street. Please present your parking ticket to our reception staff for validation after your appointment.

* This is dependent on continued approval by the South Bank Parklands car park administration. They allow only one parking validation per patient.
